

GO MILTON KEYNES!

Transport and Travel

Keeping MK moving... by car

Milton Keynes is famous for its grid roads, which is an effective road network throughout the city used by around 280,000 cars each day.

Motorists can cross from one side of the City to the other in less than ten minutes.

As Milton Keynes grows and more people take to the roads, journeys will take longer. Currently, Milton Keynes Council is planning ways to keep the road network flowing freely.

Milton Keynes has one of the most successful car-share schemes in the country.

It has more than a thousand members. Car-share owners have access to more than 400 spaces in prime locations and membership costs as little as £20 for central Milton Keynes employees. www.milton-keynes.gov.uk/transportmk

There are **25,000 parking spaces available in central Milton Keynes.** In the summer the Council will be consulting on changes to parking charges.
